

# Spring Projects

for your home

Spring is a time of new beginnings, making it the perfect season for tackling home-improvement projects. Get your house ready for warmer weather with these spring projects.

## Gutter Maintenance

Make sure your gutters can withstand April showers by either cleaning or replacing them. If they're not in tip-top shape, water can pour down the sides of your home, potentially causing damage to the windows, siding and doors.

### Signs That Your Gutters Need To Be Replaced

- Bent or floppy
- Rust
- Cracks
- Mold

## Power Wash

Spring clean your home's exterior and windows with a good power wash. If you're not sure whether your home can handle the impact from a pressure-washing nozzle, hire a professional to get the job done.

## Fresh Paint

Give a room a fresh update for spring with a new coat of paint. When deciding on the color, remember that paint often dries brighter or darker than the swatches. Avoid any unpleasant surprises by sampling the color on a piece of cardboard or a small area of a wall.

## Upgrade Your Deck

Get your deck ready for entertaining or relaxing outside! Whether you want to completely renovate or just do some cleaning and maintenance, now is the perfect time to revamp your deck.
